

**Performance Working Group
Meeting #4 Summary
June 22, 2016**

Key Points of Discussion:

- The Performance Working Group reviewed questions to use to drive charter engagements. We also mapped the data points and student information systems that various charters currently use to begin to understand our current reality.
- We have made plans to finalize the charter engagement tools and to map out data leads at each charter in preparation for outreach. We've also made initial inquiries into identifying pilot schools that would be willing to test the performance framework results and dashboard this summer.
- Our next meeting will take place in late July, where we will solidify an engagement action plan and develop our data gathering tool for collecting feedback and questions from our initial engagements that we plan to begin in August.
